

SPECS

5 reasons AI-built prototypes never reach production (and the Kiro fix)

5 steps. Save this for later.

01

No docs

Nobody wrote down what it should do.

02

No design decisions

Choices were made, but never recorded.

03

No validated requirements

Nobody checked what was actually
needed.

04

No task plan

Work happens in random order.

05

No guardrails

Every prompt starts from zero.

Five reasons your AI prototype never reaches production.

Follow theAlgurukul for a Kiro tip every day.
