

SPECS

EARS notation in 4 steps: requirements Kiro can't misread

4 steps. Save this for later.

01

Start with **WHEN**

Name the condition that triggers it.

02

Add the response

Then say what the system SHALL do.

03

One behavior each

Keep each requirement to a single behavior.

04

Let Kiro draft them

Kiro writes acceptance criteria in EARS for you.

Four steps to write requirements nobody can misread.

Follow theAlgurukul for a Kiro tip every day.
