

SPECS

Kiro bugfix spec vs feature spec vs design-first: how to choose

4 steps. Save this for later.

01

New feature?

Use a feature spec. Requirements come first.

02

Fixing a bug?

Use a bugfix spec. `bugfix.md`
replaces `requirements.md`.

03

Know the design?

Try design-first. Start from
[design.md](#).

04

Not sure?

Start with a feature spec and review it.

Four questions to pick the right type of Kiro spec.
